Project: Hooks

Where the marks go

MARKS

Inches. Across: from the left end of what you're centering on (84 in wide). Up: up from the floor.

Hook 1 of 4	27 in across · 60 in up
Hook 2 of 4	37 in across · 60 in up
Hook 3 of 4	47 in across · 60 in up
Hook 4 of 4	57 in across · 60 in up

SUMMARY

- 4 hooks, 10 in apart, all at 60 in (5 ft) up
- First to last: 30 in (2 ft 6 in)

Mark the height at ONE spot, then draw a level line across — floors aren't flat. Check each piece with the level as it goes up.

DumbLevel does math. It can't see inside your wall. Before you drill: check for wires and pipes (a detector is about $20), don't drill straight above or below an outlet or switch, and follow the instructions that came with your hardware.

Pro tip: measure twice, drill once.
