Project: A row of frames

Where the marks go

MARKS

Inches. Across: from the left end of what you're centering on (84 in wide). Up: up from the floor.

Frame 1 of 3	23 1/2 in across · 65 in up
Frame 2 of 3	42 in across · 65 in up
Frame 3 of 3	60 1/2 in across · 65 in up

SUMMARY

- Each frame is 16 in wide and 20 in tall
- Group is 53 in (4 ft 5 in) wide
- Middle of the group at 57 in (4 ft 9 in) up from the floor
- Bottom edge at 47 in (3 ft 11 in), top edge at 67 in (5 ft 7 in)
- First frame starts 15 1/2 in (1 ft 3 1/2 in) from the left end of what you're centering on (84 in wide)

Mark the height at ONE spot, then draw a level line across — floors aren't flat. Check each piece with the level as it goes up.

DumbLevel does math. It can't see inside your wall. Before you drill: check for wires and pipes (a detector is about $20), don't drill straight above or below an outlet or switch, and follow the instructions that came with your hardware.

Pro tip: measure twice, drill once.
