Project: Shelves

Where the marks go

MARKS Inches. Across: from the left end of what you're centering on (84 in wide). Up: up from the floor. Rows counted from the top.

Top · shelf — left bracket	28 in across · 61 1/2 in up
Top · shelf — right bracket	56 in across · 61 1/2 in up
Bottom · shelf — left bracket	28 in across · 48 in up
Bottom · shelf — right bracket	56 in across · 48 in up

SUMMARY

- Each shelf is 36 in wide, 1 1/2 in thick
- Total width 36 in (3 ft)
- Shelf bottoms at 48 in · 61 1/2 in up from the floor
- Top of the top shelf at 63 in (5 ft 3 in)
- Bottom to bottom, shelf to shelf: 13 1/2 in

Mark the height at ONE spot, then draw a level line across — floors aren't flat. Check each piece with the level as it goes up.

DumbLevel does math. It can't see inside your wall. Before you drill: check for wires and pipes (a detector is about $20), don't drill straight above or below an outlet or switch, and follow the instructions that came with your hardware.

Pro tip: measure twice, drill once.
